The *California Water Plan* provides a framework for water managers, legislators, and the public to consider options and make decisions regarding California's water future. The Plan, which is updated every five years, presents basic data and information on California's water resources including water supply evaluations and assessments of agricultural, urban, and environmental water uses to quantify the gap between water supplies and uses. The Plan also identifies and evaluates existing and proposed statewide demand management and water supply augmentation programs and projects to address the State's water needs.

Our goal is for the *California Water Plan Update* to meet [Water Code](#) requirements, receive broad support among those participating in California's water planning, and be a useful document for the public, water planners throughout the state, legislators and other decision-makers.

California Water Plan News

- The *California Water Plan Update 2005* [Public Review Draft](#) has been released!!!

Change is good!

- The site went “live” yesterday with the Public Review Draft of the *Water Plan*.
- April 2005
- So far so good....

California Water Plan

[Home](#) > [Regional Reports](#)

The **Regional Reports** are done for each of the 10 hydrologic regions, the mountain counties area and the Sacramento – San Joaquin Delta region, as well as a comprehensive look at the entire state. Each report includes a discussion of the state of the region, key challenges; ongoing programs; and information on water supplies and uses for water years 1998 (wet), 2000 (average) and 2001 (dry). The Regional Reports are also known as [Volume 3](#) of the [California Water Plan Update 2005](#).
